WallPerfect® W665

Breakthrough technology specifically developed for painting interior walls and ceilings...

- **Quick & Easy** — No tedious cutting in by brush required. Precise paint application at edges and corners.
- **HighSpeed** — High performance through high flow rate.
- **12m² OneWall** — 12m² per fill and high coverage in a single pass.
- **AirTunnel** — Low overspray - air tunnel surrounds spray jet.
- **Click & Paint** — Interchangable gun allows fast, simple refilling and cleaning.

Perfect walls & ceilings made easy!

PAINT SMART

WallPerfect® W665

Introducing the Wagner WallPerfect W665, an innovative paint spraying system specially designed for spraying interior walls and ceilings. The WallPerfect sets new standards in interior painting. No other unit on the market will allow you to paint interior wall and ceiling paints this quickly, with this level of control and achieve this quality of finish.

The WallPerfect W665 is a breakthrough in Power Painting technology. This high performance machine uses the latest in low pressure technology. The adjustable jet is enclosed by a warm envelope of air which allows you to work cleanly and with minimal overspray. The high flow rate allows for quick coverage on broad surface areas, with great control, giving you full and even coverage in just one pass.

Edges, corners and broad interior surfaces can now be sprayed with no tedious pre-coating with a brush and minimal masking effort, which saves time and makes painting a breeze.

With the extra-large 1.8 litre WallPerfect paint container, you can paint up to 12m² in one fill without interruption. With the Wagner WallPerfect W665, traditional brush and roller painting is a thing of the past.

Thanks to the Click 'N' Paint System, the spray attachment can be changed for another colour or removed for cleaning with just a twist of the hand.

Up to 40% faster than manual brush and rolling options.

Now you can spray ceilings, walls, corners and edges with ease. For quick masking and straight edges, simply move a cardboard piece parallel to the jet.

Backed by the 2 year Wagner DIY Warranty

Technical Data

Part Number:	2301733
Barcode:	4004025062841
Atomisation Power:	105 Watts
Power Consumption:	350 Watts
Max. Delivery:	0-250g/min
Max. Coverage:	1.8m²/min
Max. Viscosity:	130 DIN-sec
Max. Flow Rate:	0.8 litres/min
Container Capacity:	1.8 litres
Air Hose Length:	3.5 metres

Front End Options

WALLPERFECT

WallPerfect Front End 1800ml	2301735

OTHER FRONT ENDS
